CAREER OBJECTIVES

* To join a company that will further develop my skills as a programmer and video game developer.
* To make programs that are unique as well as beneficial to the company.
* To join a company that will let me learn new skills.

RELATED EXPERIENCES

Game Developer

October 2022 - May 2025

CIIT Senior Highschool, Inc.
Independent Game Release

- Developed a game titled "Shiro's Fantastical Website!" with a team in fulfillment of I3, Practical Research 2, and Entrepreneurship classes. This game utilized the Godot engine and GDScript language.
- Served as the lead programmer for Between Two Worlds, a 3D platformer game developed in collaboration with my classmates as a hobby project. This game was released on itch.io on December 19, 2024, and utilized the Godot Engine for development.
- Developed two visual novels named "The Day That You Left" and "Passing Faces." The games utilizes Ren'Py, a visual novel engine that uses Python. Programmed both games alone with the help of tutorials. Released on Itch.io on August 12, 2023 and October 13, 2024 respectively.

Web Developer

January 2024 - Present

CIIT Senior Highschool, Inc.
Self-Initiated Website

- Designed websites as part of class requirements in collaboration with a team. One project was a simple portfolio website, while the other was a website for our Attendance Monitoring System (A.M.S.), where I contributed to both the front-end and back-end development.
- Designed and published a retro-themed page in Neocities that serves as my personal website.
